## Product Overview

- Injection molded cube louver that offers unequalled economy and versatility.
- Nominal 5/16" thickness offers an important freight advantage when cube and container capacity is an issue.
- Included is a half-lap perimeter detail that facilitates continuous row applications with an unbroken appearance.

## PROFILE

# ECS Series - Plastic Eggcrate

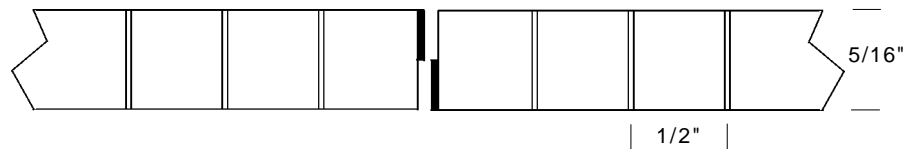

catalogue number	color	size	carton quantity
<i>styrene,</i>			
<b>ECS-24</b>	white	23 3/4" x 47 3/4"	10

## Product Overview

- Aluminum louvers offer a simple means of achieving a desired cutoff while maintaining compliance with strict fire codes.
- Stock parts are available with cell sizes of 1/2" and 1" providing a 45 degree cutoff.
- Available in a number of finishes and panel sizes.
- Cell sizes up 3 inches are available to meet special lighting and ceiling requirements.
- Luminances are not suited for VDT / CRT intensive areas.

## PROFILE

# FBCB Series - Aluminum Cross Blade Baffle

ordering information	description
<b>Specify:</b>	FBCB- <b><i>W-L-H-S-R-X</i></b>
<b><i>W</i></b>	Width: Noted as dimension "W" available in 4" to 12" widths
<b><i>L</i></b>	Length, standard is 48"
<b><i>H</i></b>	Height, 1", 1 1/2", 2" or 3"
<b><i>S</i></b>	Blade spacing required
<b><i>R</i></b>	Reveal, the dimensions the baffle will protrude below the ceiling line
<b><i>X</i></b>	Tab length required
	<b><i>90 degree and 45 degree elbows available</i></b>

## Product Overview

- The simplicity of straight blade aluminum baffle compliments the widest range of interior decors.
- 45 degree cutoff of the standard stock components provides uniform shielding angle from the light source, while maintaining a visual warmth.
- Stock parts are finished with a high reflective white lighting grade paint or anodized silver.
- Available with perimeter flange or without.
- A reveal can also be added to drop the baffle below the ceiling line for a strikingly bold visual effect.
